

CANNONIZE™

HVAC Pan Strips

CANNONIZE HVAC PAN STRIPS are for use in drain pans of many cooling units such as air conditioners, refrigerators and dehumidifiers. You may use CANNONIZE STRIPS in catch basins of any units where standing water could grow microbial, mold, algae, bacteria or viruses. Continuous use will prevent foul odors and drain line clogging caused by the build up of micro-organisms and other undesirables. The unique water activated time released design of this product provides automatic feeding for up to six months. One of the desirable characteristics of this product is the initial shock dose, which occurs during the first 48 hours, the product then settles down and controls “trickles” for the remainder of product life. Directions Install Cannonize strips in the evaporator drain pan and place it between the evaporator coil and the drain pan drain opening. Wash hands after handling.

AREAS OF USE: HOTELS/MOTELS • HOMES • OFFICE BUILDINGS
RESTAURANTS • HOSPITALS • SCHOOLS

APPLICATIONS: AIR CONDITIONERS • REFRIGERATORS •
DEHUMIDIFIERS

TECHNICAL DATA

FORM: Solid	FLASH POINT: N/A
ODOR: Fresh	FLAME EXTENSION: None
COLOR: Yellowish	SOLUBILITY IN WATER: Time released
DETERGENCY: N/A	SPECIFIC GRAVITY: 1.00
TOXICITY: N/A	% VOLATILE BY VOLUME: 0%
WETTING ABILITY: None	pH: 7
STORAGE STABILITY: 1 Year +	EVAPORATION RATE: 1
COLD STABILITY: 32° F	BIODEGRADABILITY: No
